

## USW Emergency Response Team Study:

USW Local 2020 has been chosen to participate in a study because it has been highly impacted by accidents in the workplace. The questionnaire, which takes about 10 minutes to complete, is designed to provide valuable information about how working in dangerous occupations impact USW members so that the USW Emergency Response Team can respond effectively. Results of the study may also be useful in negotiating issues related to workplace health and safety. You may be receiving a questionnaire in the mail with a pre-paid return envelope, or you can complete it online at <https://www.psychdata.com/s.asp?SID=131265>
